FACTORS CONTRIBUTING TO LOSS OF BIODIVERSITY

NATURE-BASED SOLUTIONS

NATURE NURTURING

- Regenerative farming practices
- Promoting organic and regenerative farming
- Mixed cropping systems
- Agricultural diversification
- Creating natural refugia
- Cease or limit agrochemical inputs
- Improving land management practices
- Democratising ownership of seeds
- Tree planting and reforestation
- Retain hedgerows and scrub
- Conservation headlands
- Conserving and expanding wilderness
- Reducing use of chemical pollutants
- Banning or limiting outdoor release of GE organisms
- Reducing harmful EMFs
- Stopping overfishing, overhunting and poaching
- Genuine nature-based, biodiversity enhancing solutions
