

# Attack on Food and Farmers and How to Fight Back

September 6 - 7, 2024

11am-7 pm EDT / 8am-4pm PT / 3pm-11pm GMT

Presented by

**CHD.TV**

and

**DOOR TO FREEDOM**

## Featured Speakers Include:

James Corbett

Meryl Nass MD - Host

Robert F. Kennedy Jr.

Catherine Austin Fitts

Stephanie Seneff

Patrick Wood

Joel Salatin

Rob Verkerk

Sherri Tenpenny DO

Watch the live broadcast of the symposium at the following links. The recording of the symposium will also be available after the broadcast to watch on demand.

[live.childrenshealthdefense.org/chd-tv/events/attack-on-food-and-farmers-and-how-to-fight-back/](http://live.childrenshealthdefense.org/chd-tv/events/attack-on-food-and-farmers-and-how-to-fight-back/)

[doortofreedom.org/the-attack-on-food-and-how-to-fight-back-symposium/](http://doortofreedom.org/the-attack-on-food-and-how-to-fight-back-symposium/)

**11:00 AM EDT**     **Introduction**  
*Opening remarks by Meryl Nass, MD*

### SESSION 1

The general outline of the attack on food and agriculture

**11:05 AM**     **Catherine Austin Fitts**  
*Food: Freedom or famine*

**11:25 AM**     **Patrick Wood**  
*Food as a weapon against civilians is entering a new phase as One Health and genetic modification are in bloom*

### SESSION 2

So many ways our food supply is being attacked

#### A. POISONS IN OUR FOOD AND HOW THEY HARM US

**11:50 AM**     **Andre Leu, D.Sc**  
*Regenerating agriculture, from degenerative toxic industrial agriculture to regenerative nature-based living systems - which system will we choose?*

**12:15 PM**     **Zen Honeycutt, BA**  
*Food supply exposé and what we can do to be healthy*

**12:37 PM**     **Michael Baum, JD**  
*A win against Roundup, followed by an audacious attempt to end pesticide/herbicide injury litigation*

**1:00 PM**     **Don M. Huber, Ph.D.**  
*Glyphosate: A betrayed trust and its remediation*

**1:25 PM**     **Stephanie Seneff, Ph.D.**  
*Glyphosate, the ecosystem, and climate change*

**1:55 PM**     **Jeffrey Smith**  
*Are GMOs and Roundup causing your disease?*

**2:15 PM**     **Jeffrey Smith**  
*Existential threats from gene editing—via food, environment, and the microbiome*

**B. INDUSTRIAL FARMING VERSUS INDEPENDENT FARMERS**

- 2:40 PM**     **Breeauna Sagdal, BA**  
*Barriers to market access and liquidity for small farms*
- 3:00 PM**     **John Klar, Esq.**  
*The antidote to industrial agriculture is below our feet*
- 3:20 PM**     **John Moody**  
*Dirt poor & badly bred – what happened to all the nutrition in our food supply?*

**C. REDUCING AVAILABLE FARMLAND**

- 3:35 PM**     **Brook DeLorme**  
*Transmission lines and solar panels breaking up farmland*
- 3:45 PM**     **Abby Rockefeller**  
*Sewage sludge is sewage sludge; it is not “biosolids”*

**D. REDUCING HIGH QUALITY FOOD AND FOOD ITSELF**

- 4:00 PM**     **Brian Hooker, Ph.D.**  
*Avian influenza (bird flu)*
- 4:20 PM**     **Sherri Tenpenny, DO, AOBNMM, ABIHM**  
*Vaccines in our food*
- 4:50 PM**     **Tracy Thurman**  
*Abolishing the Amish alternative – because it works*

**E. HOW GOVERNMENT REGULATION HAS BEEN USED IN THE ATTACK**

- 5:15 PM**     **Margaret Byfield, ED**  
*Assault on our land & liberty*
- 5:35 PM**     **Pete Kennedy, Esq.**  
*Regulatory obstacles for raw milk and local meat: efforts to overcome them*
- 5:55 PM**     **Sen. Frank Niceley**  
*How we made changes in Tennessee*
- 6:20 PM**     **Alexis Baden-Mayer, Esq.**  
*The farm bill & the plot to replace real farms with fake food*

**F. NOVEL FOODS: BUGS, LAB-GROWN FOODS, SYN BIO: TRANSITIONING THE FOOD SUPPLY**

- 6:45 PM**     **Robert Verkerk, BSc, MSc, DIC, Ph.D, FAC.**  
*Why regenerative agriculture, livestock and real meat are under attack*
- 7:10 PM**     **Elze Van Hamelen, MA, MBA**  
*Pharma food – biotech on your plate: the next chapter in big money’s battle to end food sovereignty*

### G. GEOENGINEERING IS REAL, AND HOW IT IS ATTACKING FOOD AND FARMING

- 11:05 AM** **Peter A. Kirby**  
*What is geoengineering?*
- 11:05 AM** **J. Marvin Herndon, Ph.D.**  
*The United Nations ENMOD treaty enabled an attack on food, agriculture, and life*
- 11:05 AM** **Ginny Silcox, AAS, BA, MA**  
*Electromagnetic weather control*

### SESSION 3

Solutions: How do we fix this?

- 12:10 PM** **James Corbett**  
*The future of food is ours to decide*
- 12:35 PM** **Robert F. Kennedy, Jr.**  
*A new farm program for America*

### A. GROWING FOOD ON THE FARM AND IN THE GARDEN - TRICKS OF THE TRADE

- 12:45 PM** **John Day, MD**  
*Preparing your kitchen garden*
- 1:10 PM** **Mark Fulford**  
*Un-farming the farmers - to clean up the food chain and environment*
- 1:40 PM** **Sara Woods Kender**  
*Off-grid life: Independence, resiliency, health*
- 2:05 PM** **Joel Salatin**  
*The perfect patron*

### B. TEACHING OUR CHILDREN ABOUT FARMING AND ALL THAT GOES WITH IT

- 2:15 PM** **Leigh Merinoff, BFA, MFA**  
*Educating kids about farming*
- 2:35 PM** **John Klar, Esq**  
*The battle over food education*

### C. FOOD SOVEREIGNTY AND FOOD SECURITY

- 3:00 PM** **Richard C Cook**  
*Food sovereignty*
- 3:25 PM** **Lt. Col. Tommy Waller**  
*Food security is national security*

**D. CHANGING THE RULES: CHALLENGING  
GOVERNMENT REGULATIONS**

**3:50 PM**     **Breeauna Sagdal, BA**  
*Solutions provided through “The Beef Initiative”*

**4:05 PM**     **Judith McGeary, BS**  
*The fight to block electronic tracking of our animals*

**E. HEALING WITH WHOLESOME FOOD**

**4:25 PM**     **Mark McAfee**  
*Powerful bioactives in raw milk*

**4:40 PM**     **Michelle Perro, MD, DHom**  
*Formula for change: unveiling the truth and necessity of cleaning up infant formula*

**5:05 PM**     **Meleni Aldridge, BSc NutrMed PgDip CPNI Cert LTHFE**  
*Food is medicine. But why - and how?*

**5:30 PM**     **Meryl Nass, MD, John Klar, Esq, Catherine Austin Fitts**  
*What are the most important things we just learned?*

**6:00 PM**     **Meryl Nass, MD, Catherine Austin Fitts**  
*Fixing this together: Taking Action*

# Participants

## Meryl Nass, MD

- Internal Medicine physician, practicing 1980–2022, also trained in Functional Medicine
- First person in the world to investigate an epidemic (which was anthrax in Rhodesia, occurring 1978–80) and prove it was due to biological warfare (1992)
- Consulted on chem/biowarfare for the Cuban Ministry of Health, GAO, World Bank, Director of National Intelligence (1993, 1999, 2001, 2008)
- 6 testimonies to Congress on anthrax vaccine, biological warfare and Gulf War syndrome (1999–2009)
- Helped lead a coalition of military servicemembers and families to fight anthrax vaccine mandates (1998–2005) and get a court to revoke the vaccine license (2004)
- Helped edit 3 of Robert F. Kennedy, Jr.'s books (2021–2023)
- Medical license suspended for providing alleged 'misinformation' about the COVID vaccines and using hydroxychloroquine and ivermectin to treat COVID (January 2022–present)
- Testified in or briefed Members in 7 European parliaments on the World Health Organization (2023–2024)
- Founded "Door to Freedom" to stop the WHO's sovereignty grab over global public health and pandemics--that mission was just accomplished. Now we have expanded our mission to include educating on false pandemic narratives like bird flu and monkeypox and fighting back against the global attack on food and agriculture.

## Catherine Austin Fitts

Catherine Austin Fitts offers Solari Report subscribers a unique perspective on how to navigate the opportunities and risks in the global financial system and political economy.

Catherine is the president of Solari, Inc., publisher of the Solari Report, and managing member of Solari Investment Screens, LLC. Catherine served as managing director and member of the board of directors of the Wall Street investment bank Dillon, Read & Co. Inc., as Assistant Secretary of Housing and Federal Housing Commissioner at the United States Department of Housing and Urban Development in the first Bush Administration, and was the president of Hamilton Securities Group, Inc. Catherine has designed and closed over \$25 billion of transactions and investments to-date and has led portfolio and investment strategy for \$300 billion of financial assets and liabilities.

Catherine graduated from the University of Pennsylvania (BA), the Wharton School (MBA) and studied Mandarin Chinese at the Chinese University of Hong Kong. She blogs for the Solari Report at [solari.com](http://solari.com).

Catherine's experiences on Wall Street and in Washington D.C. are chronicled in Dillon Read and the Aristocracy of Stock Profits (available in German, French and Spanish) and her personal history investigating the money missing from the US federal government: "Long ago, I made a promise that I would never act against the best interests or the

excellence of my own people—that I would do my best to ensure that we were worthy of the stewardship of our world and that we did our best to leave a better world for generations yet to come. To make and keep such a promise is to understand that money and position are tools, not goals, and that death is not the worst thing that can happen. Some would probably accuse me of ‘fighting the tape’ and not being ‘good at the game.’ I would tell those people that now is not the time in the history of our people for a failure of imagination.”

The Solari Report: [solari.com](http://solari.com)

## Patrick Wood

Author, lecturer, and expert on Technocracy, Transhumanism, and globalization.

[sv.technocracy.news](http://sv.technocracy.news)

[CitizensForFreeSpeech.org](http://CitizensForFreeSpeech.org)

[@stoptechnocracy](https://twitter.com/stoptechnocracy)

## Andre Leu, D.Sc

Professor Dr. André Leu, D.Sc., is the International Director of Regeneration International. Regeneration International has 570 partners in 76 countries and works with numerous agricultural systems such as agroecology, organic, permaculture, ecological agriculture, AMP grazing, biological agriculture, organic agriculture, and agroforestry. He is an expert in these fields, having spent over 50 years as an agroecological regenerative organic farmer working and visiting countries developing food and farming systems across Asia, the Pacific, Europe, North America, South America, and Africa.

Andre has published four books: *The Regenerative Agriculture Solution*, *Growing Life*, *Poisoning Our Children*, and *The Myths of Safe Pesticides*. He has also published extensively in magazines, newspapers, scientific journals, conference proceedings, newsletters, and websites and has conducted numerous media interviews for TV, radio, and online systems.

He lectures and teaches at universities, institutions, and workshops worldwide and is an Adjunct Professor of Regenerative Agriculture at South Seas University. He speaks at conferences, seminars, workshops, and United Nations events on every continent. He meets with governments, United Nations bodies, industry, farmers, consumers, and NGOs on the multi-functional benefits of regenerative agriculture.

André and his wife Julia live on their organic tropical fruit farm in Daintree, Australia. Qualifications:

- Doctorate of Science, Environmental and Agricultural Systems, Faculty of Agricultural and Natural Resources, Rajamangala University of Technology, Chonburi, Thailand, 2022
- Graduate Diploma in Adult Education, University of Technology Sydney, 1992  
Bachelor of Arts Communications, with a Double Major in Social-Political Theory and Video Production, University of Technology Sydney, 1989

[regenerationinternational.org](http://regenerationinternational.org)

## Zen Honeycutt, BA

Zen Honeycutt is the Founding Executive Director of non-profit Moms Across America, a National Coalition of Unstoppable Moms with the motto “Empowered Moms, Healthy Kids.” Moms Across America’s leaders created over 1,000 community events in all 50 states to raise awareness about GMOs, toxins in the food supply, and other environmental issues that pose risks to the health of our families.

The organization’s mission is to educate and empower mothers and others with actions and solutions to create healthy communities and has had over 100 million impressions on social media and beyond. Zen instigated the first consumer-funded glyphosate testing in America which has led to over 60 countries and hundreds of cities, homeowners associations, and school districts banning or restricting the use of glyphosate. Moms Across America successfully petitioned Costco to remove Roundup from their shelves, leading to nationwide awareness of alternatives to Roundup and the benefits of regenerative organic farming.

Zen’s inspiration came from her three boys who had allergies, autoimmune, asthma, and autism symptoms, which greatly improved when they went GMO-free and organic. She then instigated a national and global movement to transform the food supply. Through the expansion of the nationwide and now global network, with over 100 million impressions over the past 11 years, her team discovered that thousands of other Moms are seeing the similar results from avoiding GMOs and eating organic.

Zen is the author of UNSTOPPABLE, Transforming Sickness and Struggle into Triumph, Empowerment, and Celebration of Community. She was also the director of a short film called Communities Rising and recently launched a new non-profit pilot program called “The Neighborhood Food Network” to create a parallel food system, one street at a time.

Zen has received numerous activism awards, has been featured in mainstream media news networks such as CNN, NBC, CBS and ABC, over a dozen documentaries such as BOUGHT, Secret Ingredients, Modified, and Common Ground, in hundreds of podcasts, and other media outlets. She has served on the board of the California Organic Products Advisory Committee of the Secretary of Agriculture and works with the former Minister of Agriculture of Japan and hundreds of activists in Japan to transform the global food supply.

Zen, formerly of Connecticut, New York City, and California, currently resides in North Carolina. She has three sons – Ben, Bodee, and Bronson, who grow food with her, along with twenty-six farm animals.

Moms Across America: [momsacrossamerica.com](http://momsacrossamerica.com)

## Michael Baum, JD, BA

Michael Baum, a senior partner at Wisner Baum, is known for taking on high-stakes litigation against Big Pharma and Big Ag. Many of the cases his firm has litigated have resulted in multiple label changes, landmark verdicts and the publishing of thousands of pages of declassified internal company documents that expose corporate corruption, ghostwriting and scientific manipulation.

Wisner Baum (formerly known as Baum Hedlund) co-led the first successful jury trials against Monsanto for Roundup (glyphosate) weed killer causing cancer. Michael and his colleagues served on the trial teams for the first three Roundup trials against Monsanto (Bayer), resulting in \$2.424 billion in jury verdicts for the plaintiffs. These

trial victories paved the way for settlement resolutions for over 100,000 plaintiffs in 2020 worth a combined \$10.9 billion. The first groundbreaking trial for Mr. Dewayne “Lee” Johnson, caught the attention of Netflix, which is in the process of making a movie adaptation to be released in 2025.

During the Roundup litigation, Michael’s team obtained a trove of internal documents known as the Monsanto Papers, which they ensured were declassified and released to regulatory agencies, scientists, and the general public. With invitations from lawmakers in various countries, Michael traveled with his partner Brent Wisner, to the EU and Canada to brief regulators on the key evidence uncovered in the Monsanto litigation. His influence on public policy concerning Roundup led Politico to choose Michael as one of five “changemakers” in the world making waves in pesticides policy, one of many awards and recognition Michael and his firm earned for their historic success.

[wisnerbaum.com/](http://wisnerbaum.com/)

## **Don Huber, PhD**

Dr. Don M. Huber, Professor Emeritus of Plant Pathology at Purdue University, holds B.S. and M.S. degrees from the University of Idaho, a Ph–D from Michigan State University, and is a graduate of the US Army Command & General Staff College, Industrial College of the Armed Forces, and National Security Program.

He was Cereal Pathologist at the University of Idaho for 8 years before joining the Department of Botany & Plant Pathology at Purdue University in 1971. His agricultural research the past 60 years has focused on the epidemiology and control of soilborne plant pathogens with emphasis on microbial ecology, cultural and biological controls, nutrient–disease interactions, pesticide–disease interactions, physiology of host–parasite relationships and techniques for rapid microbial identification.

Dr. Huber retired in 1995 as Associate Director of the Armed Forces Medical Intelligence Center (Colonel Retired, U.S. Army) (now the National Center for Medical Intelligence, Dr. Huber is a past Chairman of the USDA–APS National Plant Disease Recovery System; a member of the US Threat Pathogens Committee; former member of the Advisory Board for the Office of Technology Assessment, U.S. Congress (now Congressional Research Service); and Global Epidemiology and Quadripartite Medical Working Groups of the Office of the US Surgeon General.

He is author or co–author of over 300 journal articles, Experiment Station Bulletins, book chapters and review articles; six books, and 84 special invited publications; and an active scientific reviewer; speaker; consultant to academia, industry, and government; and international research cooperator.

## **Stephanie Seneff, Ph.D**

Dr. Stephanie Seneff is a Senior Research Scientist at MIT’s Computer Science and Artificial Intelligence Laboratory in Cambridge, Massachusetts, USA. She has a BS degree from MIT in biology and MS, EE and PhD degrees from MIT in electrical engineering and computer science.

Her recent interests have focused on the role of toxic chemicals and micronutrient deficiencies in health and disease, with a special emphasis on the pervasive herbicide, glyphosate, and the mineral, sulfur. Since 2008, she has authored over 40 peer–reviewed journal papers on these topics. She is the author of a book on glyphosate,

titled “Toxic Legacy: How the Weedkiller Glyphosate Is Destroying Our Health and the Environment,” which was released by Chelsea Green publishers on July 1, 2021. This book was selected by Kirkus Reviews as one of the best non-fiction books of 2021.

[StephanieSeneff.net](http://StephanieSeneff.net)

## Jeffrey Smith

Founder and Executive Director of IRT; International Best-Selling Author; Award-winning Filmmaker.

As a global thought leader on the health dangers of genetically modified organisms (GMOs) for over 27 years, Jeffrey Smith has authored 2 bestsellers, directed 5 documentaries, delivered 2,000 lectures and interviews in 45 countries, trained 1,500 speakers, and organized more than 10,000 grassroots advocates.

Jeffrey has counseled world leaders on six continents, and his meticulous research presented at medical conferences inspired thousands to prescribe non-GMO and organic diets.

The success of the GMO education movement he pioneered is measured in part by the 48% of world consumers who acknowledge GMOs are unhealthy.

### Taking on GMO 2.0

Jeffrey and IRT are now sounding the alarm about new genetic engineering techniques, such as gene editing. Unregulated, GMO 2.0 can cause health and environmental disasters.

The most urgent danger comes from genetically engineered microbes. Jeffrey is stewarding a global effort to prevent their release.

Jeffrey’s inspiring talks are highly rated by conference audiences. To schedule a presentation or interview, please contact [info@responsibletechnology.org](mailto:info@responsibletechnology.org).

## Breeauna Sagdal, BA

Breeauna Sagdal is the Senior Writer and Research Fellow of the I Am Texas Slim Foundation 501(c)(3), and the Editor At-Large of BeefNews.org. With over a decade in policy, Breeauna began working towards food security following the deficits of the Covid-19 pandemic.

Breeauna, her husband and two children, operate Sagdal Family Farms where they have worked to serve their community by producing nutrient-dense, regenerative and ethically raised animal-proteins locally, while educating a national audience on the barriers ranchers face daily.

[@ModernTman](https://twitter.com/ModernTman)  
[BeefNews.org](http://BeefNews.org)  
[@Breeauna9](https://twitter.com/Breeauna9)

## John Klar, Esq

John Klar is an attorney, farmer, food rights activist, and author. John has written for numerous national outlets including Mother Earth News, Human Events, American Spectator, American Thinker, the Federalist, and is a staff writer for Liberty Nation News. John's 2023 book, Small Farm Republic, centers local agriculture in a healthy American future. John raises grass-fed beef and lamb in central Vermont.

[johnklar.substack.com](http://johnklar.substack.com)

## John Moody

When John almost died in 2004 from severe health issues, he turned to a surprising place to find healing – food. He discovered a world that he never knew existed, with options and alternatives to a standardized farming, food and health system that seemed more intent on healthy profits than healthy people. He and his family have spent almost two decades rebuilding local food systems, homesteading, teaching, and occasionally picking fights with the state and federal government.

[johnwmoody.com](http://johnwmoody.com)

[facebook.com/john.moody.3781](https://facebook.com/john.moody.3781)

## Brook DeLorme

Brook is an artist and writer. She lives off grid in Central Maine with her husband and dog. She became interested in the topic of transmission lines, solar panel fields, and wind turbines when a major high-voltage transmission line was proposed through her tiny small town.

## Abby Rockefeller

Abby Rockefeller is a long time organic grower and recently the maker of a raw milk dairy. She is also in the midst of a radical change in understanding of what's going on in the world

## Brian Hooker, Ph.D

Brian S. Hooker, PhD, is the Chief Scientific Officer at Children's Health Defense, an organization committed to the best health for children in the U.S. and worldwide. He is also Emeritus Professor of Biology at Simpson University in Redding California where he specialized in microbiology and biotechnology.

In 1985, Dr. Hooker earned his Bachelor of Science degree in chemical engineering, from California State Polytechnic University, Pomona, California. He earned his Masters of Science degree in 1988 and his doctorate in 1990, both in biochemical engineering, from Washington State University, in Pullman, Washington.

Brian Hooker has many accomplishments to his credit including: co-inventor for five patents, recipient of the Battelle Entrepreneurial Award in 2001, and a Federal Laboratory Consortium Recognition Award in 1999, for his work on "Reactive Transport in 3-Dimensions." The breadth of Hooker's over 75 science and engineering papers have been published in internationally recognized, peer reviewed journals.

Dr. Hooker has been active in vaccine safety since 2001 and has a 26-year-old son with autism. In 2013 and 2014, Dr. Hooker worked with the CDC Whistleblower, Dr.

William Thompson, to expose fraud and corruption within vaccine safety research in the CDC which led to the release of over 10,000 pages of documents.

[@BrianHookerPhD](#)

[Vax-Unvax - Let the science speak](#)

## **Sherri Tenpenny, DO, AOBNMM, ABIHM**

Dr Sherri Tenpenny is an osteopathic medical doctor, board-certified in osteopathic medicine, with a proficiency certification in Integrative Medicine. She was previously board-certified in Emergency medicine, when she worked as a full-time Emergency Medicine physician and served as Director of a Level II Trauma center for 12 years. The founder of Tenpenny Integrative Medical Center, a clinic located near Cleveland, Ohio, her clinic provides natural, holistic approaches to getting well. Their success has attracted patients from all 50 states and more than 20 countries.

Dr. Tenpenny's authority in the field of vaccines is unparalleled. Over the last nearly 25 years, she has invested tens of thousands of hours of research and writing time to expose problems associated with vaccines. Her expertise is widely recognized, as she is a frequent speaker at national and international conferences and a regular guest on various media platforms, sharing her highly researched information on the importance of informed vaccine decisions.

Dr. Tenpenny also owns several online businesses and has started a new venture for health focused on ECP, External Counter Pulsation, with two locations, Cleveland, Ohio, and Ventura, CA, with more locations planned. You can find out more information by going to [TenpennyECP.com](#)

All her contact and educational links to books and podcasts are available at [DrTenpenny.com](#)

Website: [DrTenpenny.com](#)

Education: [Learning4You.org](#)

## **Tracy Thurman**

Tracy Thurman is an advocate for regenerative farming, decentralized food systems and medical freedom. She writes for Children's Health Defense and the Brownstone Institute and speaks at events nationwide. She also works with the Barnes Law firm to safeguard the right to purchase food directly from farmers without government interference.

[tracythurman.substack.com](#)  
[x.com/tracyathurman](#)

## **Margaret Byfield, ED**

Margaret Byfield is a national speaker, writer and commentator on property rights issues. She serves as the Executive Director of American Stewards of Liberty (ASL), which has been leading the campaign to stop the Biden Administration's 30x30 agenda to permanently protect 30 percent of America's land by 2030.

Most recently, ASL lead the effort to defeat Natural Asset Companies, or NACs, which would have given foreign adversaries control over America's natural resources.

American Stewards of Liberty is the nation's oldest property rights organization focused solely on the mission to protect property rights and the liberties they secure. Margaret's education began on Pine Creek Ranch in Central Nevada where her family became one of the first Western landowners targeted by the radical environmental agenda resulting in the 27 year legal battle, Hage v. United States. She has appeared on Epoch TV, FOX News, and has spoken at Freedom Fest, CPAC and other programs across America.

American Stewards for Liberty: [americanstewards.us](http://americanstewards.us)

## **Pete Kennedy, Esq.**

Pete is an attorney in Sarasota, Florida, who works on state legislation and policy regarding raw milk, cottage foods, food sovereignty, and on-farm/custom slaughter of meat and poultry--consulting on efforts to change state administrative regulations and policies.

He has worked on successful state legislation in all these areas. He has also worked on numerous matters for farmers at the administrative level involving FDA and USDA, state health and agriculture departments, and local health departments to protect farmers threatened by enforcement actions such as handling food seizures, embargo and recall cases, right-to-farm and zoning issues as well as problems with local ordinances.

Pete was a founding board member of the Farm-to-Consumer Legal Defense Fund (FTCLDF) and served as vice president and then president for many years while also providing member services. He currently consults on policy and legal matters for the Weston A. Price Foundation (WAPF) and serves on the board of directors. Pete hosts the Solari Report Food Series audiocasts and is the executive director for the Food Freedom Foundation, a 501(c)(3) nonprofit.

Food Freedom Foundation [FFF]: [foodfreedomfoundation.org](http://foodfreedomfoundation.org)

## **Senator Frank Niceley**

Senator Frank Niceley's life and family history is deeply embedded in East Tennessee where he has been a farmer for five decades. While in office Frank passed bills legalizing the distribution of raw milk through herdshare agreements, legalizing sales of raw butter by licensed dairies, and adopting the federal poultry exemption enabling farmers to process up to 20,000 birds a year. His accomplishments have repeatedly earned him 'Solari Hero of the Week' and in 2023, he was also the Solari 'Hero of the Year'. Frank has been married to his wife Cyndie for over 50 years and has 4 children.

## **Alexis Baden-Mayer, Esq.**

Alexis Baden-Mayer is a lawyer who has worked since 2005 as the Political Director of the Organic Consumers Association, a network of more than 2 million activists committed to creating a healthy, just, democratic and regenerative food system. In 2014, the US Health Freedom Congress awarded Alexis a Health Freedom Award for fearless civil disobedience, including shutting down the National Organic Standards Board to protest the weakening of organic standards and entering the White House grounds to deliver a petition in support of GMO labels, one of Barack Obama's unfulfilled campaign pledges.

In 2023, she was awarded the Women's Institute for Freedom of the Press's Women in Media Award for her investigation into the origins of SARS-CoV-2 in "gain-of-

function research,” a euphemism for genetically engineered bioweapons. Alexis is currently writing a book on how the weaponization of influenza, first accomplished in the 1940s, is part of the plot to consolidate and control the food system, eventually replacing real farms with fake food.

[organicconsumers.org](http://organicconsumers.org)  
[scamerica.substack.com](http://scamerica.substack.com)

## **Robert Verkerk, BSc MSc DIC PhD FACN**

Founder, Alliance for Natural Health Executive & Scientific Director Alliance for Natural Health International & Alliance for Natural Health USA Rob Verkerk PhD is a multi-disciplinary scientist, researcher, educator, regulatory expert and campaigner with 40 years’ experience in the non-profit sector, academia and as a consultant to the regenerative agriculture and natural products sectors.

He holds Masters and PhD degrees from Imperial College London where he continued as a postdoctoral researcher for a further 7 years, working in Eastern and Southern Africa, as well as Central and South East Asia. In 2002, Dr Verkerk founded the non-profit Alliance for Natural Health (ANH) that has been at the forefront of protecting and promoting natural and regenerative health approaches and health freedom internationally.

He has acted as ANH’s executive and scientific director since its inception, and in April 2023, after being ANH-USA’s scientific director for 15 years, Dr Verkerk also became the organization’s executive and scientific director. Dr Verkerk is passionate about creating positive transformation in the world by working with nature, not against it. He has authored more than 60 papers in scientific journals and conference proceedings and has pioneered novel approaches to risk- benefit assessment and regenerative health.

The Alliance for Natural Health: [anhinternational.org](http://anhinternational.org) [anh-usa.org](http://anh-usa.org)

## **Elze Van Hamelen, MA, MBA**

Dutch researcher and writer Elze van Hamelen began breaking through the “propaganda barrier” in 2014, recalibrating her understanding of how the world works. At the time, she was a corporate sustainability consultant. Six years of independent research and the events of 2020 prompted her decision to leave the corporate world and work with independent “new media” platforms in the Netherlands (of which there are, fortunately, quite a few).

In October 2021, she joined De Andere Krant, a 100% reader-funded print newspaper, writing weekly contributions on the topics of “people and power.” (De Andere Krant literally means “The Other Newspaper,” but it also has a double meaning, “The other side of the story.”) She was invited in 2022 by Catherine Austin Fitts to investigate lab-grown meat, resulting in the Solari ‘Pharma Food’ report.

In the subsequent Solari investigation ‘Dutch Farmers and Fishermen: Local Heroes in the Global War on Our Food and Property Rights’ she dived into the history of industrial farming and the erosion of property rights. Elze has an unparalleled capacity to do deep-dive research and loves teaching and sharing information.

Increasingly, she is devoting her time to in-person presentations and workshops, having discovered that live discussions are often necessary to help “land” the information that she shares. As she observes, the workshop format and connection

with others are useful for shifting people from a position of fear to one focused on action and solutions

## **Peter A. Kirby**

Peter A. Kirby is a San Rafael, CA researcher, writer, and activist most commonly doing deep dives into specific subjects, resulting in unique books. He is a staff writer at [ActivistPost.com](http://ActivistPost.com). His articles on Activist Post usually promote his books as well as his Rumble show [The Abstract](#). He has produced three titles so far: [Chemtrails Exposed: A New Manhattan Project](#), [From Little Acorns and The Fall of San Francisco](#). Among many others, Peter has appeared as a guest on the Corbett Report with James Corbett, the SGT Report with Sean and Coast to Coast AM with George Noory. Peter has been published on websites such as: [DavidIcke.com](http://DavidIcke.com), [GlobalResearch.ca](http://GlobalResearch.ca), [SGTreport.com](http://SGTreport.com) and [NaturalNews.com](http://NaturalNews.com). His work has been translated into Spanish, Dutch, Swedish, French, Italian, Russian and more.

## **J. Marvin Herndon, Ph.D.**

J. Marvin Herndon earned the BA degree in physics in 1970 from the University of California, San Diego, the Ph.D. degree in nuclear chemistry in 1974 from Texas A&M University, and advanced training in geochemistry and cosmochemistry at the University of California, San Diego.

Dr. Herndon's published discoveries include recognizing that Earth's early formation as a Jupiter-like gas giant makes it possible to derive virtually all the geological and geodynamic behavior of our planet, including the origin of fold-mountain chains, the primary initiation of fjords and submarine canyons; the origin and typography of ocean floors and continents via his [Whole Earth Decompression Dynamics](#); Earth's previously unanticipated and potentially variable energy and heat sources, such as a terra-centric nuclear fission reactor at the center of Earth; the origin of Earth's magnetic field; and more.

He revealed the basis of similarities and differences between Earth's origin and the origins of other planets in the solar system; how stars, including our own sun, ignite; and the reason why the vast multitude of galaxies in the universe display just a few prominent patterns of luminous stars. Recently he discovered that particulate pollution, not carbon-dioxide, is the primary cause of anthropogenic global warming. His forensic scientific investigations of jet-laid aerosol trails led to the discovery of the pseudo-legal basis of United Nations sanctioned environmental warfare against Earth's inhabitants, food supply, and agriculture.

[NuclearPlanet.com](http://NuclearPlanet.com)

## **Ginny Silcox, AAS, BA, MA**

Ginny Silcox has years of R&D experience in electromagnetic compliance for light-based medical monitors including tissue spectrometers and pulse oximeters. This work investigated radiated and conducted emissions, electrostatic discharge, and short and long-field radio emissions.

She has degrees in music, electronics, and ESL, and several years of experience designing training for the DOE Emergency Operations Training Academy, a part of the National Nuclear Security Administration that required a Q clearance. Both parents were general aviation pilots, and vacations were spent camping, fishing, and boating on the Delaware Bay and Atlantic Ocean.

The family supplied the bulk of its own food with a one acre garden and constant work at a local diversified farming operation that included a large store. These experiences led to a habit of watching the weather, and an awareness that food security affects every person on the planet.

[rumble.com/c/DarkOutpost](https://rumble.com/c/DarkOutpost)

## James Corbett

James Corbett is an award-winning investigative journalist, James Corbett has lectured on geopolitics at the University of Groningen's Studium Generale, and delivered presentations on open source journalism at The French Institute for Research in Computer Science and Automation's FOSSa conference, at TedXGroningen and at Ritsumeikan University in Kyoto.

## Robert F. Kennedy Jr.

Robert F. Kennedy, Jr. is an attorney and recently suspended his campaign for President of the United States as an Independent. He has written two recent best-sellers: [The Real Anthony Fauci](#) (2021) and [The Wuhan Cover-Up and the Terrifying Bioweapons Arms Race](#) (2023). Robert F. Kennedy Jr. is Founder of Waterkeeper Alliance and was Founder, Chairman of the Board, and Chief Legal Counsel for Children's Health Defense.

Mr. Kennedy is an esteemed author, with a long list of published books including the New York Times' bestseller, [Crimes Against Nature](#). Mr. Kennedy was named one of TIME magazine's "Heroes for the Planet" for his success helping Riverkeeper lead the fight to restore the Hudson River. His reputation as a resolute defender of the environment and children's health stems from a litany of successful legal actions. He received recognition for his role in the landmark victory against Monsanto last year, as well as in the DuPont Case that inspired the movie "Dark Waters" (2019).

## John Day, MD

John Day MD is a 66 year old Family Practice doctor, who has devoted his career to public health, including work on the Navajo Reservation in Arizona, Rural Texas and Rural Hawaii and inpatient Psychiatry in the Texas State Hospital System, and Obstetrics, including teaching and supervising Family Practice Physicians in Training as an Obstetrical Fellow and a Family Practice Faculty Member.

He is the grateful Husband of Jenny, a School Librarian, Proud Father of four young adults: Holly, an Internal Medicine Physician, Steve and Jim, both Engineers, and Amber, who is a Mathematician, with two Masters Degrees, and is who getting paid to do a PhD in Statistics.

He was an early treating physician at his federally qualified public health clinic in Austin, initially using hydroxychloroquine, azithromycin, zinc and vitamin-D, until forbidden to prescribe hydroxychloroquine in August 2020, when the first good medical-study on ivermectin, zinc and doxycycline, with vitamin-D came out from Bangladesh, and he was able to treat people with that effective combination.

He was fired for COVID “vaccine” refusal on moral grounds, the creation of a lesser class of humans, while planting the winter vegetables in the garden he kept for his coworkers at the clinic, in October 2021.

He has been vegetable gardening since 2013, and has worked out a flexible succession-rotation gardening protocol, which helps keep pests and disease from building up in the beds, and puts some nitrogen into each bed every third year. Since being fired he has been building in the “dream house” he designed and general contracted on, since the basic external structure was completed in early 2022. He learned a lot and it’s now “finished”.

## Mark Fulford

Independent Farmer, Farm Consultant & Boots-on-the-Ground Trouble Shooter and Ag Educator.

Farming In Waldo County, Maine since 1979. Working till present promoting alternatives to mainstream agriculture in service of food sovereignty and soil repair. Currently developing Systems of Crop Intensification with local and global organizations while mentoring new farmers.

Presenter, field researcher, and writer for revealing and healing the many missteps of corporate driven agriculture. Providing field days for hands on agricultural skills. Active throughout US and Puerto Rico, Globally travelled and self educated to bring truth and fresh approaches to farmers seeking self determination and farm integrity. Dedicated to exposing the willful destruction of our soils, water sheds, local and global food supplies. Promoting the removal of middlemen and agency interference as farmers seek to tell the real story of food production to consumers.

[markfulford@protonmail.com](mailto:markfulford@protonmail.com)

## Sara Woods Kender

Sara Woods Kender is a Clinical Herbalist and Wild Forager. She owns and operates Sacred Tree Herbals, an herbal apothecary in NH and teaches classes on herbal medicine and foraging. She also teaches online with Dr. James Lyons-Weiler of IPAK-EDU.org. She lives off-grid with her husband and two daughters where growing food and plant medicine is an integral part of her life.

She is an active wild plant and food forager on her 40-care parcel and her life has revolved around natural approaches to health. Her life’s work is to help other’s find healing through nature and advocate for Health Freedom by encouraging her community as well as her family and friends to step outside the conventional system. Living off grid and embracing natural approaches to health has allowed for a step toward independence and resiliency.

[Sacred Tree Herbals](#)

## Joel Salatin

Joel Salatin and his team operate Polyface Farm in Virginia’s Shenandoah Valley, producing salad bar beef, pigaerator pork, pastured poultry and forestry products.

Author of 16 books, Salatin is editor of The Stockman Grass Farmer and writes articles for numerous magazines.

The farm ships pastured livestock products nationwide, services 35 urban drop points in the metropolitan mid-Atlantic region, and hosts 15,000 visitors a year for farm tours, events, and seminars. His weekly podcast with Dr. Sina McCullough is Beyond Labels and his blog is Musings from the Lunatic Farmer. He travels worldwide speaking to farmers about ecological agriculture and urban consumers about integrity food issues. His self-made handle is “Christian libertarian environmentalist capitalist lunatic farmer.”

## **Leigh Merinoff, BFA, MFA**

Meadows Bee Farm, 4980 Windham Hill Road, Windham, VT 05359  
West River, VT. Benefactor, community organizer. Since 2007, I have focused on building out a community hub with a farmers market, café, thrift shop, and post office. This is a lively engaged community with multiple weekly social activities, many of which are centered around a large wood-burning pizza oven. In addition, Up the hill from the community center, I have built two biodynamic farms, with on-site, an arts center, a cut room, a lab and an artisanal library. There is a range of livestock, including Jersey A2 cows, a small beef meat herd, sheep, fowl, bees, orchards, and gardens.

The Young Farmers Program. Founder, educator. In 2013 I formalized our children’s educational program at Meadows Bee Farm and The Field House, teaching homesteading, farming, the farm arts, and science fundamentals. In total we teach over 30 subjects, from livestock to agroecology and herbal medicine, with approximately 700 class visits a year. We have been offering homeschool days, intensives, summer camps, and weekend classes. Our farm has worked closely with local public schools offering farm to school education for over 10 years. Young Farmer Starts. Founder, educator. In 2023 we began to build a national homesteading educational curriculum for children, continuing the work I began on our farm with the YFP. This new program will focus on immersing young people in ecological farming and homesteading and the farm arts, with a major focus on healthy nutrition-based eating.

### Current Nonprofit Activities:

- Children’s Health Defense. Current board member. Focused on preventing childhood epidemics, health freedom, and more.’
- Heifer International, Little Rock AR, and Overlook Farm, Rutland, MA. Ambassador, Development, Eastern Advisory Committee, 2000–2020.
- West River Community Project, West Townshend Country Store, Windham, VT. Co-founder. Acquired and built out the last remaining commercial building in West Townshend. Now a community center dedicated to food security, arts, and culture, including a thrift store, post office, farmers market, and commercial kitchen.

### Education:

- BFA, University of Michigan, Ann Arbor, MI, 1981
- MFA, Hunter College, NY, NY, 1991

## Rickard C. Cook

Richard C. Cook is a retired U.S. federal analyst with extensive experience across various government agencies, including the U.S. Civil Service Commission, FDA, the Carter White House, NASA, and the U.S. Treasury. As a whistleblower at the time of the Challenger disaster, he exposed the flawed O-ring joints that destroyed the Shuttle, documenting his story in his book “Challenger Revealed.”

After serving at Treasury, he became a vocal critic of the private finance-controlled monetary system, detailing his concerns in “We Hold These Truths: The Hope of Monetary Reform.” He served as an advisor to the American Monetary Institute and worked with Congressman Dennis Kucinich to advocate for replacing the Federal Reserve with a genuine national currency. See his new book, *Our Country, Then and Now*, Clarity Press, 2023. Also see his Three Sages Substack and his American Geopolitical Institute articles at <https://www.vtforeignpolicy.com/category/agi/> Mr. Cook strongly recommends the writings of Bô Yin Râ as a guide to humanity’s future: “Every human enterprise must serve life, must seek to enrich existence on earth, lest man become enslaved where he seeks to establish his dominion!” Bô Yin Râ (Joseph Anton Schneiderfranken, 1876–1943), translation by Posthumus Projects Amsterdam, 2014. Also see the Kober Press edition of “The Book on the Living God” here.

Articles by Mr. Cook on Food sovereignty:

## Lt. Col. Tommy Waller

Lt. Col. Tommy Waller is the President & CEO of the Center for Security Policy. Tommy retired from the U.S. Marine Corps after two decades of service (in both active duty and the reserves) as an Infantry Officer and Expeditionary Ground Reconnaissance Officer. He conducted multiple deployments to Afghanistan, Iraq, Africa, and Central America.

His formal education includes numerous military schools and colleges, a bachelor’s degree in International Relations from Tulane University and executive education in high stakes negotiation from the Wharton School. As a Lieutenant Colonel he commanded the Marine Corps Reserves’ only independent Force Reconnaissance Company.

[He retired from the Corps after being denied a religious accommodation for the COVID-19 vaccine and after being asked to serve as the President & CEO of the Center for Security Policy.]

[Center for Security Policy](#)

## Judith McGeary, BS

Judith McGeary is an attorney, activist, and regenerative farmer. After earning her B.S. in Biology from Stanford University and her law degree with high honors from the University of Texas at Austin, she clerked for the Federal Fifth Circuit Court of Appeals and went on to private law practice. During that time, she became a passionate advocate of sustainable agriculture, and she and her husband established a small farm, raising grass-fed beef and lamb, along with garden produce and orchard fruits. After seeing how government regulations benefit industrial agriculture at the expense of family farms, in 2006 she founded the Farm and Ranch Freedom

Alliance (FARFA) to promote common-sense policies for local, diversified agricultural systems. Judith has been profiled in the Texas Observer and Edible Austin, appears in the documentary Farmageddon, and has been interviewed on numerous radio shows across the country. Judith served as the Vice Chair of the USDA Secretary's Advisory Committee on Animal Health for six years and was a founding Board member of the Farm-to-Consumer Legal Defense Fund. You can contact Judith at [Judith@FarmAndRanchFreedom.org](mailto:Judith@FarmAndRanchFreedom.org) or 254-697-2661.

[Farm and Ranch Freedom Alliance](#)  
[@FarmAndRanchFreedom](#)

## Mark McAfee

Mark founded the Raw Milk Institute (RAWMI) in 2011 to assure that farmers had a resource to train them in producing very low risk raw milk for their consumers. Mark is passionate about “grass to glass” risk reduction management on the farm, and he believes that raw milk cannot emerge as a trusted food unless it is very low risk. He is certified in HACCP management from Chapman University and has developed and implemented award winning Food Safety Plans including Raw Milk Risk Analysis & Management Plans (“RAMP”).

Mark is the CEO and founder of Raw Farm, the world's largest raw milk dairy . Founded in 1998, today it sells its CDFA and FDA approved raw products across the United States of America in over 1500 store locations. The Raw Farm brand estimates that it feeds over 100,000 families in California alone with its tested 85,000 gallons of raw milk it produces every week. Mark has developed pioneering food safety technologies using advanced rapid testing systems to assure that raw milk is very low risk yet retains its health giving “bioactives”.

Mark is a premed-trained retired EMS Paramedic and acute care medical educator with a background in organic farming. For 16 years Mark worked full time as a paramedic while part time farming at the same time. In 1997, Mark was awarded the Best of the West grower award for being the first farmer in the USA to initiate an “on farm audited HACCP type risk management system” with the Odwalla juice company. Mark has lectured on the food safety and gut biome benefits of raw milk at USC, Stanford, UCSB, Rutgers, University of Guelph, Uvic BC Canada, UCLA, CSUF, Chico State and other Universities and medical schools in Australia, USA and Canada. He is the VP of California Dairy Campaign and is a delegate to the National Farmers Union where he has pushed for and set national policy for support of Raw Milk.

Mark has been active in legislating for world class raw milk standards and has been instrumental in passing new raw milk laws in states that previously banned raw milk. Mark is a member of the International Milk Genomics Consortium and is the only farmer in the room filled with PhD researchers when he attends the international conference for the last 12 years. Raw Farm has been awarded Fresno County dairy of the year for both 2023 and 2024.

He is a private pilot and has served as a LIGA fly doctors clinic mission pilot since 1990 and also serves as a sworn Search and Rescue SAR pilot for the Fresno County Sheriff Department. His favorite role is husband to his wife Blaine wife ( MSRN L & D ) of 43 years and grandpa to six awesome grandkids. My passion is teaching and educational research in the betterment of health and humanity from Farm to Consumer.

## Michelle Perro, MD, DHom

Michelle Perro, MD, DHom, is a veteran clinician with over four decades of experience in both pediatrics as well as in integrative medicine, treating both children and their families. Her career began in Pediatric Emergency Medicine winding its way into integrative medicine over the past 25 years. She has been director of a Pediatric Emergency Department in NYC and spent over a decade at UCSF Benioff Oakland Children's Hospital Emergency Department.

Dr. Perro has been a tireless advocate regarding the role of GM food and their associated pesticides centered on their affect on children's health. Dr. Perro has lectured nationally and internationally on the state of our children's health and produced the first Children's Environmental Health Bill of Rights. She is co-author of the highly acclaimed book, "[What's Making our Children Sick?](#)".

She is the CEO/co-founder of the website [www.gmoscience.org](http://www.gmoscience.org), focused on food as medicine and the regeneration education movement. Her monthly podcast, The New MDS can be found here: [gmoscience.org/the-new-mds/](http://gmoscience.org/the-new-mds/)

For parents' advice, visit: [gmoscience.org/parent-education/](http://gmoscience.org/parent-education/)

Her next book, "Making our Children Well" is scheduled to be released in 2025.
